Situation Awareness Brief

Monday, July 9th 2018
As of 0900 CST

Tropical Weather Awareness

The National Hurricane Center is issuing advisories on Tropical Storm Chris, located a couple of hundred miles south-southeast of the North Carolina Outer Banks. An area of showers and thunderstorms associated with the remnants of Beryl is producing locally heavy rainfall and strong gusty winds over the northeastern Caribbean Sea and the northern Leeward Islands. The disturbance is expected to move west-northwestward for the next day or so, passing over the Virgin Islands and Puerto Rico today, and over Hispaniola tonight. Unfavorable upper-level winds and interaction with land should prevent redevelopment during the next day or two, but environmental conditions could become somewhat conducive for regeneration of a tropical cyclone later this week when the system is forecast to turn northward over the Bahamas and the western Atlantic. Additional information on this system can be found in High Seas Forecasts issued by the National Weather Service. Formation chance through 48 hours...low...near 0 percent. Formation chance through 5 days...medium...40 percent

Incidents Reported to the State Operations Center (last 24 hours)

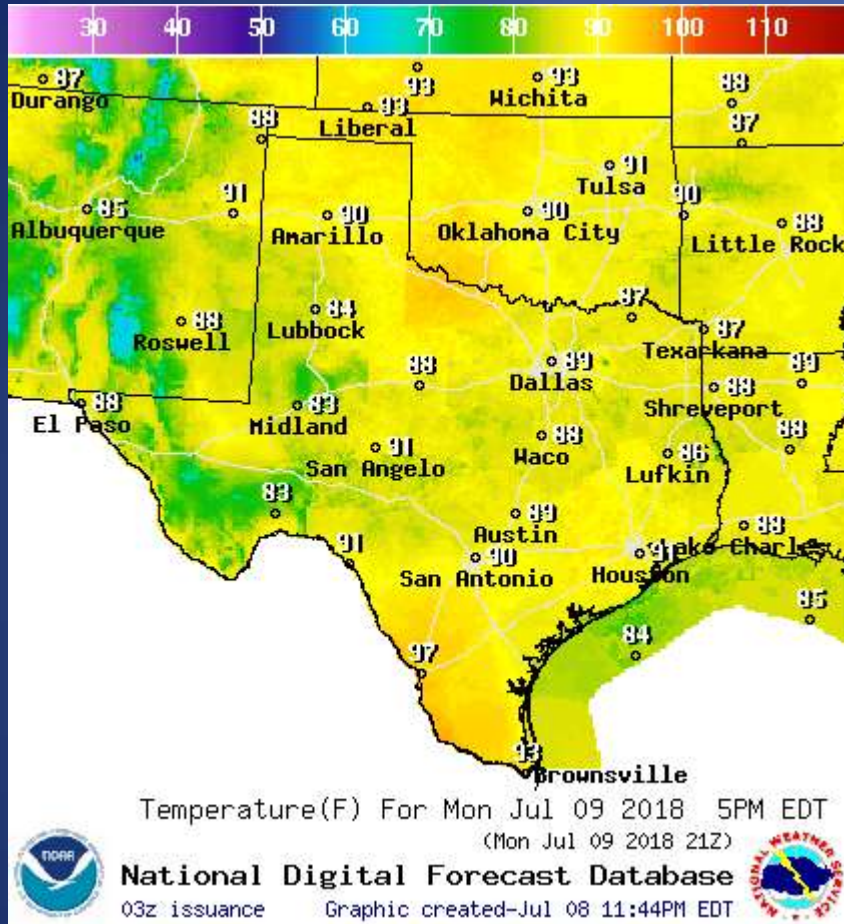

DATE	EVENT / INCIDENT	LOCATION (City/County)	Final Report: Y/N
07/08/18	Final Report of the Brad Fire	Palo Pinto County	Y

Hazardous Weather

Scattered Showers & Thunderstorms Today

Rain Chances, mainly between 11 AM and 9 PM Today

Weather Forecast Office
San Angelo, TX
Issued Jul 09, 2018 4:28 AM CDT

f t NWS San Angelo

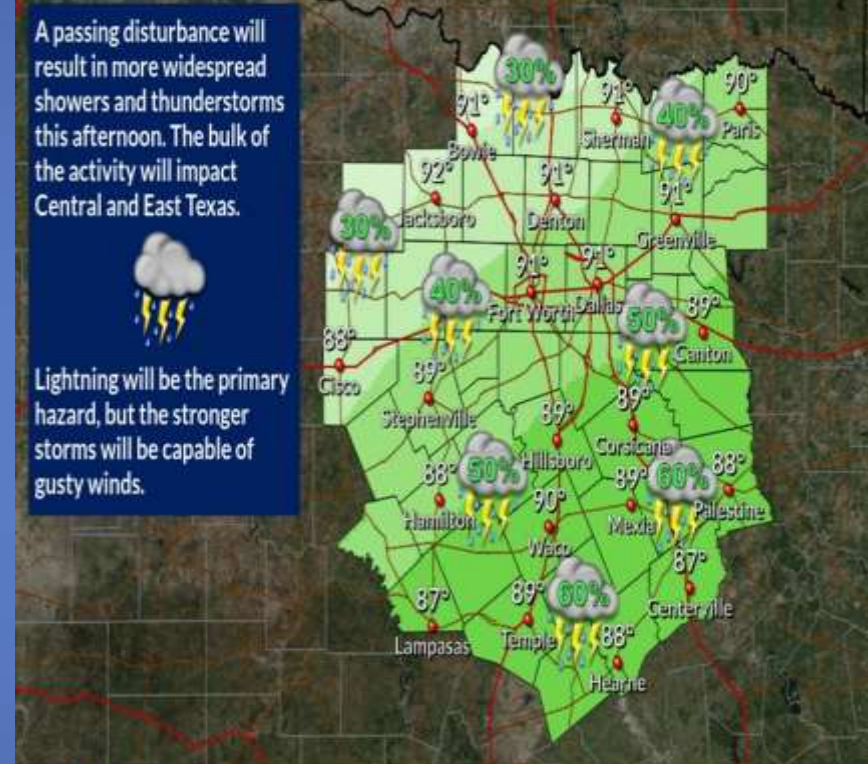

weather.gov/sjt

Scattered showers and thunderstorms are expected today. The main time frame will be between 11 AM and 9 PM, and the higher rain chances and coverage are across the area south of Interstate 20. The main hazards will be dangerous lightning with the storms, and minor flooding from locally heavy rainfall. Temperatures will be a little cooler today.

A Better Chance of Rain Today

Increased cloud cover will reduce afternoon temperatures.

Weather Forecast Office
Fort Worth, TX
Issued Jul 09, 2018 5:56 AM CDT

f t NWS Fort Worth

weather.gov/fortworth

A passing disturbance will result in more widespread showers and thunderstorms this afternoon. The bulk of the activity will impact Central and East Texas. Lightning will be the primary hazard, but the stronger storms will be capable of gusty winds.

Hazardous Weather

Weather Forecast Office
Austin/San Antonio, TX

Issued Jul 09, 2018 5:01 AM CDT

Abundant tropical moisture will continue to interact with weak disturbances to produce a good chance of rain and thunderstorms across South Central Texas today. There should still be plenty of intermittent sunshine in areas not receiving rain. High temperatures will be mainly in the upper 80s and low 90s. Winds will primarily be from the east at 10 mph or less.

Weather Forecast Office
Midland/Odessa, TX

Issued July 9, 2018 2:29 AM CT

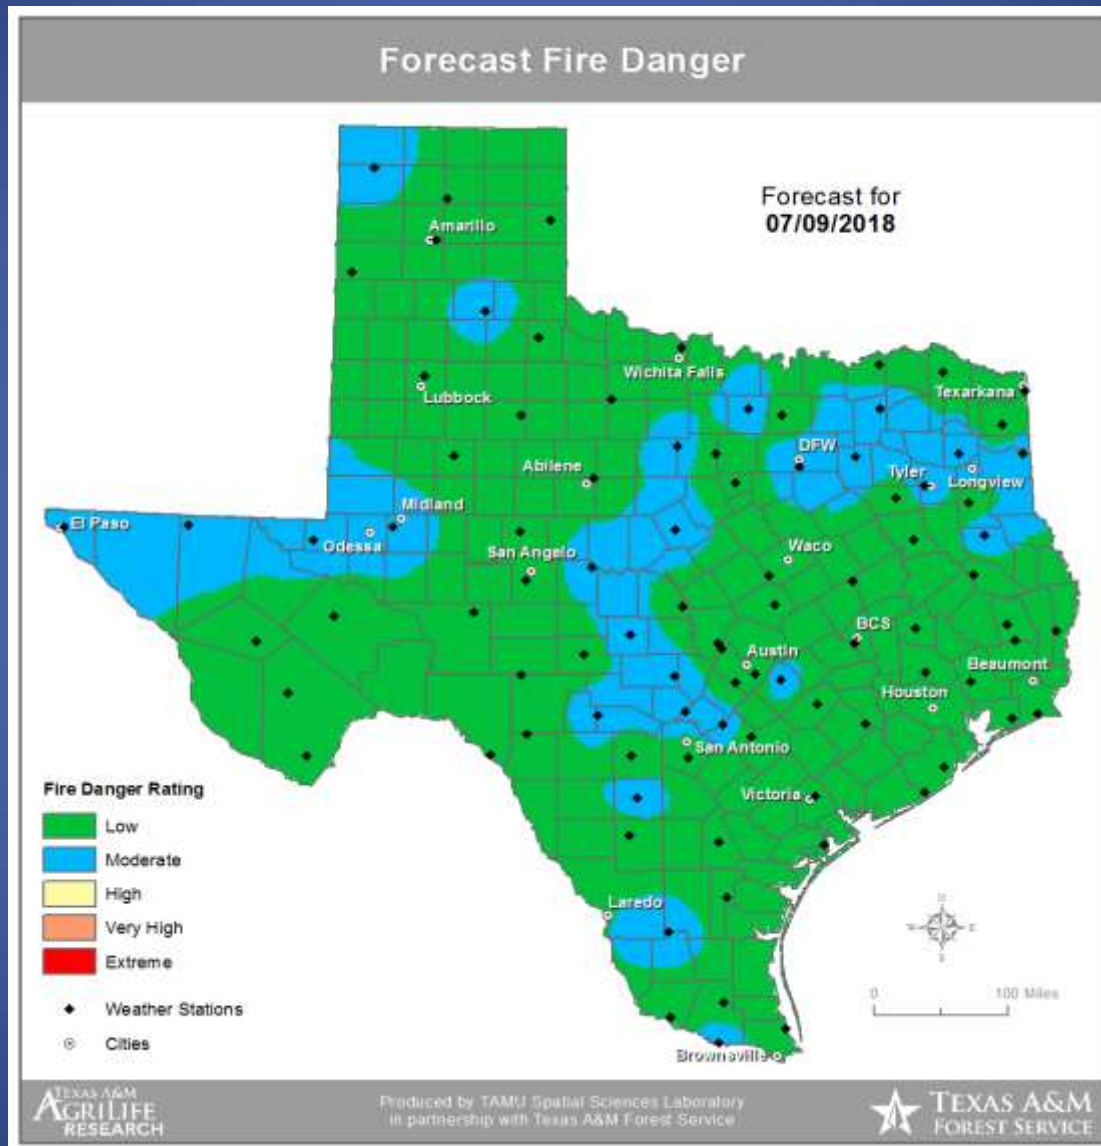

Thunderstorms will once again be possible across all of West Texas and Southeast New Mexico. Any storms that do develop may be accompanied by heavy rainfall and flash flooding. Otherwise, at-or- below normal temperatures will continue.

Weather Warning/Advisories Issued
